

TECHNICAL NOTE

USDA NATURAL RESOURCES CONSERVATION SERVICE PACIFIC ISLANDS AREA

Vegetative Technical Note - No. 6

Commercial Sources of Plant Materials Native to the Pacific Islands Area

PREFACE

Enclosed is a list of sources of plant materials native to the Pacific Islands Area. The list is not complete and does not constitute a guarantee of reliability or quality of product. No endorsement is intended or implied and no discrimination is intended by omission. This document is intended as an in-service reference.

The basis for this document is on current listings and will be kept as current as possible. Please notify us if there are known sources of native plants not shown on the attached list.

Although the sources listed are primarily nurseries that sell native plants in containers, some may also provide propagation materials such as un-rooted cuttings and seeds. Some may be contracted to produce a specified quantity of a certain species. In addition, sources may be contracted to do the actual planting on site.

Some of the nurseries may not currently produce a particular native plant. Please contact these sources. If they don't have the plants you need, ask for a referral. Some nurseries have excellent Web sites that are informative and helpful.
